

STATE OF WASHINGTON
DEPARTMENT OF ECOLOGY

PERMIT
TO APPROPRIATE PUBLIC WATERS OF THE STATE OF WASHINGTON

☐

Surface Water

(Issued in accordance with the provisions of Chapter 117, Laws of Washington for 1917, and amendments thereto, and the rules and regulations of the Department of Ecology.)

☒

Ground Water

(Issued in accordance with the provisions of Chapter 263, Laws of Washington for 1945, and amendments thereto, and the rules and regulations of the Department of Ecology.)

PRIORITY DATE November 8, 1993	APPLICATION NUMBER G2-28963	PERMIT NUMBER G2-28963	CERTIFICATE NUMBER
-----------------------------------	--------------------------------	---------------------------	--------------------

NAME Jack Johnson			
ADDRESS (STREET) PO Box 1119	(CITY) Belfair	(STATE) Washington	(ZIP CODE) 98528-1119

The applicant is pursuant to the Report of Examination which has been accepted by the applicant, hereby granted a permit to appropriate the following public waters of the State of Washington, subject to existing rights and to the limitations and provisions set herein.

PUBLIC WATERS TO BE APPROPRIATED

SOURCE Well		
TRIBUTARY OF (IF SURFACE WATERS)		
MAXIMUM CUBIC FEET PER SECOND	MAXIMUM GALLONS PER MINUTE 200	MAXIMUM ACRE FEET PER YEAR 112
QUANTITY, TYPE OF USE, PERIOD OF USE 112 Acre-feet per year	Irrigation (80 Acres)	May 15 to October 15

LOCATION OF DIVERSION/WITHDRAWAL

APPROXIMATE LOCATION OF DIVERSION--WITHDRAWAL 1000 feet East and 750 feet South of the Northwest corner of Section 32.

LOCATED WITHIN (SMALLEST LEGAL SUBDIVISION) NW¼ NW¼	SECTION 32	TOWNSHIP N. 23	RANGE, (E. OR W.) W.M. 1W	W.R.I.A 15	COUNTY Mason
--	---------------	-------------------	------------------------------	---------------	-----------------

RECORDED PLATTED PROPERTY

LOT	BLOCK	OF (GIVE NAME OF PLAT OR ADDITION)
-----	-------	------------------------------------

LEGAL DESCRIPTION OF PROPERTY ON WHICH WATER IS TO BE USED

Lots 35, 36 & 37 of the plat of Sam B. Theler Home & Garden Tracts as recorded in Volume 4 of plats, page 20, all within Mason County, Washington.

DESCRIPTION OF PROPOSED WORKS

A proposed well 8 inches to +/- 150 feet.

DEVELOPMENT SCHEDULE

BEGIN PROJECT BY THIS DATE: May 1, 2001	COMPLETE PROJECT BY THIS DATE: May 1, 2003	WATER PUT TO FULL USE BY THIS DATE: November 1, 2008
--	---	---

PROVISIONS

An approved metering device shall be installed and maintained in accordance with RCW 90.03.360, 90.44.450 and WAC 508-64-020 through -040, and WAC 508-12-030. Meter readings shall be recorded at least monthly.

All wells constructed in the State shall meet the construction requirements of Chapter 173-160 WAC entitled *Minimum Standards for Construction and Maintenance of Wells*, and Chapter 18-104 RCW entitled *Water Well Construction Act of 1971*.

Flowing wells shall be constructed and equipped with valves to ensure that the flow of water can be completely stopped when not in use. Likewise, the well shall be continuously maintained to prevent the waste of water through leaky casings, pipes, fittings, valves, or pumps - either above or below land surface.

A completed well report of the well shall be submitted by the driller to the Department of Ecology within 30 days of completing this well. All pump test data for this well shall be submitted to the Department as it is obtained.

The water user is advised that quantities recommended, and the number of acres to be irrigated, may be reduced at the time of issuance of a final water right commensurate with the capacity of the installed system, and the number of acres actually irrigated.

"The permittee or certificate holder, and its successor(s) shall provide data on chloride concentrations for the well authorized by this permit or certificate with analysis performed by a state accredited laboratory. Accreditation information may be obtained from Ecology's Quality Assurance Program at (360) 895-4649. Sampling shall occur in August of each year, with a copy of the laboratory results submitted by October 15 of the same year, to the Department of Ecology, Southwest Regional Office, Washington."

"If pumping of the well authorized by this permit or certificate causes chloride concentrations to exceed 25 milligrams per liter, immediate action shall be required to prevent concentrations from increasing (such as reducing the instantaneous withdrawal rate (gpm) of the well). If corrective measures fail to prevent chloride concentrations from exceeding said level in the future, permittee or certificate holder shall relinquish the option to perfect additional allocated quantities regardless of the stage of development."

The amount of water granted is a maximum limit that shall not be exceeded. The water user shall be entitled only to that amount of water within the specified limit that is beneficially used, and that amount of water required for the actual crop grown on the number of acres and place of use specified.

The applicant is advised that notice of Proof of Appropriation of water (under which the final certificate of water right is issued) should not be filed until the permanent distribution system has been constructed and that quantity of water allocated by the permit to the extent water is required, has been put to full beneficial use.

A proof inspection will be conducted prior to final certificate issuance. The certificate will reflect the extent of the project perfected within the limitations of the permit. Aspects will include as appropriate the source(s), system instantaneous capacity, beneficial use(s), annual quantity, acreage, place of use, and satisfaction of provisions.

This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or to give notice to the Department of Ecology on forms provided by that Department documenting such compliance.

Given under my hand and the seal of this office at Olympia, Washington,

this 12th day of April, 2001.
